

RETROFIT FLASHING SYSTEMS

[Retrofit Flashings](#)- for existing penetrations that can not be disconnected. Retrofit Flashings offer quick and easy installation, eliminating roof leaks at pipes and other roof penetrations without disconnecting the penetration. However, the Retrofit still allows for movement between the penetration and roof, while maintaining a perfect seal. The perfect seal is achieved with an integral tongue and groove closure, plus an overlapping flap, and is mechanically fastened with stainless steel hardware, which is included. Retrofit Flashings have excellent resistance to both ozone and ultraviolet degradation and a serviceable temperature range of -60F to +270F. In addition, [Retrofit Adapter Rings](#) accommodate very small round penetrations and unusual shapes such as angle irons and square tubes.
