

The best flange in the business is now better...

Deeper Butyl Pocket

Pre-punched Holes

Unique Reinforcement Rib

Ward Industries introduces:

Quick Flange™

This revolutionary new flange installs in half the time it takes to install conventional flange. With pre-punched holes in the flange, Quick Flange eliminates the need for any extra tools normally associated with attaching the flange to the duct work. This creates tremendous labor savings for the end user. It is a cleaner, safer, and more user friendly approach to traditional methods of attaching flange to the ductwork.

Try it today and experience the quick, effortless ductwork connections you deserve.
